

Using the Code from the link above (see attachment, I came up with:  
(attached screenshots are below ;-)

For [RIG404] [View] [Zip] [Fax] - all are links (innertext)

WOULD i USE: code

```
Set ObjWebTable = Description.Create  
ObjWebTable("class").Value = "4-column-table"  
ObjWebTable("innertext").Value = ".*Evaluate.*"
```

```
Set TableCollection = Browser(Wisdom).Page(Wisdom_Env).ChildObjects(ObjWebTable)  
intTableCount = TableCollection.Count
```

```
ObjLinkRowsFound = 0
```

```
For i = 0 to intTableCountRow - 1  
  For j = 0 to 4 ' (intTableCountCol)
```

```
    Set ObjLink = TableCollection(i).ChildItem(i, j, "Link", 0) ' You have to check this number & change the Col number, if  
    needed.
```

```
    If ObjLink.GetROProperty("class") = "RIG404" Then
```

```
      ObjLinkRowsFound = 1
```

```
    Exit For
```

```
  End If
```

```
Next
```

```
Next
```

```
If ObjLinkFoundRows = 1 Then
```

```
  ObjLink.Click
```

```
Else
```

```
  'Report Something
```

```
  MessageBox = "No Reports Found"
```

```
  Exit
```

```
End If
```
