I have been using a set of checkpoints for a long time now, and just recently they stopped working. As you can see by my screenshots, everything is setup correctly "I think". Can someone look over my OR and code screenshots and let me know what my issue may be?

Run Error

The "WebTable_AccountNo" object was not found in the Object Repository.
Check the Object Repository to confirm that the object exists or to find the correct name for the object.

Line (178): ''.WebElement("WebTable_AccountNo").Check CheckPoint("Account No.") ' was WebTable''.

Tip: If the objects in your application have changed, the Maintenance Run Mode can help you identify and update your steps and/or the objects in your repository.
